Project Flow

Projects

Whenever a project manager will create the project it will come under the In-Progress Project

In_progress

Closed Projects are those projects which are closed because client is not giving us update or further funds.

Closed

CLOSED

Completed

Reopen

REOPENING

Hold

Project which is open and developers still working on it and it has thress status inside it (Hold , closed,completed)

Completed Projects are those project which are completed according to client's requirement

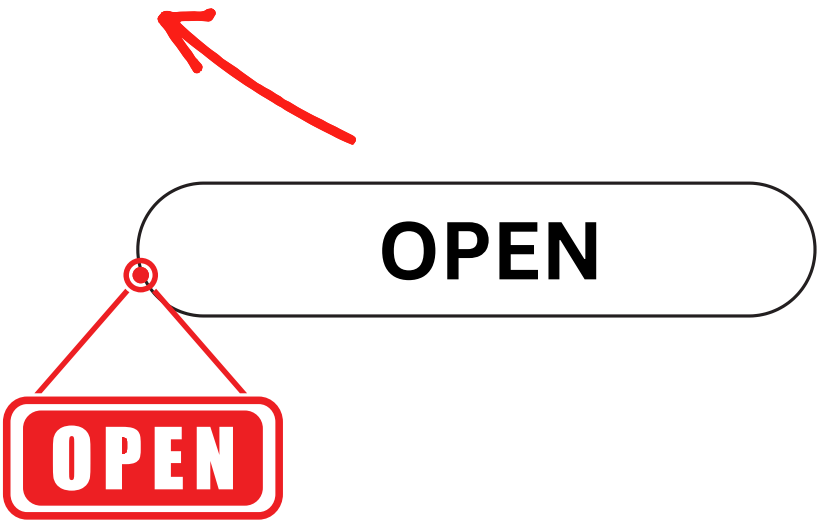

Hold Projects are those projects which are hold due to certain conditions OR client ask to not go for further updates and functionalities

Reopen Projects are those projects which were closed due to certain reasons and again gets reopen on certain conditions

Project Flow

Whenever a task it comes under the OPEN category

Tasks

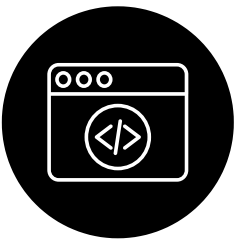

Closed / Deployed

CLOSED

whenever a task is passed all the states and pass the testing phase , then it will consider as closed / deployed

In Dev

Whenever a task is started by developer it will appear in dev section

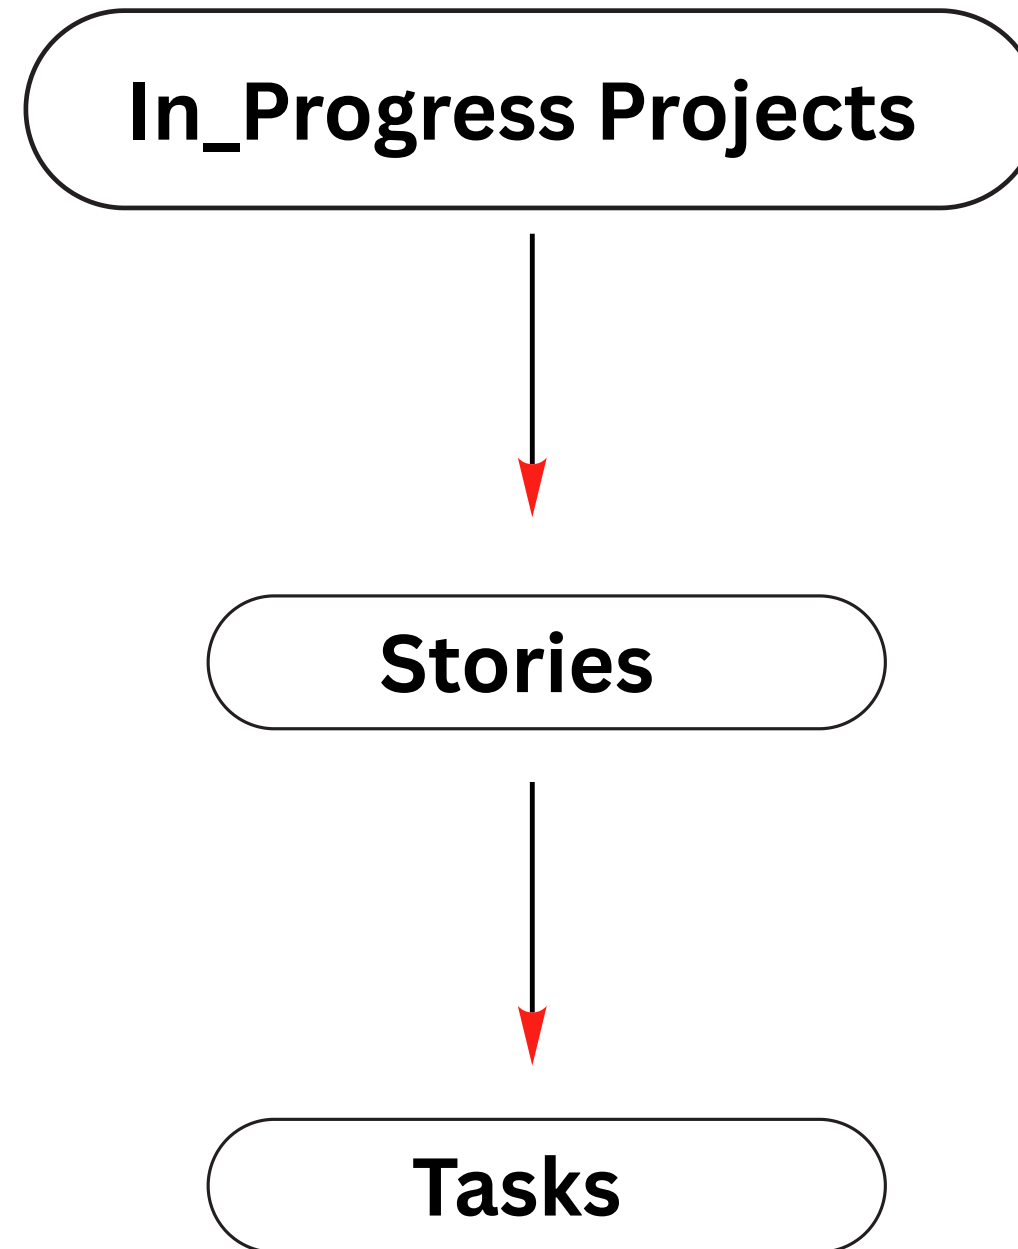

Testing

Whenver a developer raise a testing request it will be testing phase

Process Flow

For all the projects which are in **In-Progress** we can maintain them in following process..

Process Flow
